

CBD GUIDE

Our classic CBD products:

- CBD Gummies.
- CBD Hard Candies.
- CBD Raw Honey.
- CBD Tincture.
- CBD Handcrafted Bath Bombs.
- CBD Bath Salts.
- CBD Body Rub.
- CBD Infused Lip Balm.

What is CBD?

Cannabidiol or CBD is a non-psychoactive cannabinoid compound with enormous therapeutic potential.

Cannabinoids trigger receptors in the brain and body. In addition to the phyto-cannabinoids produced by the plant, there are endogenous cannabinoids that occur naturally in the body, as well as synthetic cannabinoids created by pharmaceutical researchers.

CBD is a non-toxic, non-euphoric substance that doesn't give any psychoactive effects. CBD works synergistically with THC. Cannabidiol enhances THC's painkilling impact, while modifying THC's psychoactivity. CBD can also neutralize unfavourable effects that THC may cause, such as anxiety or rapid heartbeat. CBD-rich cannabis may be an appealing option for those seeking the medicinal benefits of cannabis without the unwanted side effects.

Why is it important?

CBD-rich oil extracts and other CBD-infused products are poised to play a more prominent role in the burgeoning medical marijuana industry, as providers and product-makers increasingly cater to a broad constituency in an effort to attract new clientele.

CBD has strong anti-oxidant, anti-inflammatory, anti-spasm, anti-convulsant, anti-psychotic, anti-tumoral, and neuro-protective properties. CBD directly activates serotonin receptors, causing an anti-depressant effect as well.

Scientific and clinical studies have shown that CBD could be therapeutic for many conditions including chronic pain, cancer, anxiety, diabetes, epilepsy, rheumatoid arthritis, PTSD, sleep disorders, alcoholism, cardiovascular disease, antibiotic-resistant infections, and neurological ailments.

How can I use CBD?

CBD oil can be taken orally, sublingually or applied topically. Concentrated cannabis oil extracts can also be utilized as an ingredient to vaporize or cook with. Some cannabis oils come with an applicator for measured dosing. These oil extracts—CBD-rich and THC-dominant—are very potent. The time of onset and duration of effect vary depending on the method of administration.

Our CBD-rich remedies are available in many forms: edibles, topicals, tinctures, and extracts.
